## AESyphon

### ABOUT

AESyphon is a plug-in for Adobe After Effects that acts like a Syphon server and provides a live preview to any Syphon client. Just drop the file in the Plug-ins folder, start After Effects and you are ready to go.

*PLEASE NOTE: AESyphon does not appear anywhere in After Effects. It is a plugin without a user interface. Simply start After Effects and your Syphon client will show the input from After Effects.*

### DOWNLOAD

The free version is limited to QVGA resolution (1024×768):

download free version (77 KB)

The unlimited version can be obtained by donating a fee of **\$20 USD**. Available here:

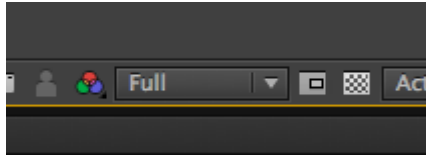

<https://gumroad.com/l/aesyphon>

### INSTALL

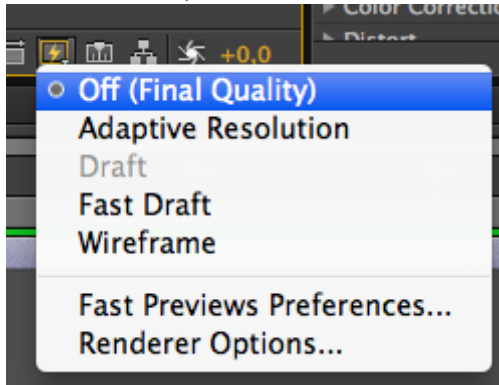

Just unzip the file and move it to your After Effects's plug-in folder. Typically:  
/Applications/Adobe After Effects CC/Plug-ins/

**TIPS**

To keep After Effects from outputting low-resolution previews, please choose "Full" resolution preview:

And disable fast previews:

**KNOWN ISSUES**

For unknown reasons After Effects produce a darker preview image when using 32-bit float. If you experience a dark output image, please change your project color settings to 8-bit or 16-bit:
